

## **Multimedia 2-Your first video Napoleon Dynamite**

Working with a team of four or so, depending on class size, You will create a storyboard, film, edit, and export a video based on the Napoleon Dynamite trailer. Each member of the team will be assigned a task by the other team members, all team members will contribute to the filming and editing of the video. This project cannot be successfully completed without contributions from each team member. At the end of the assignment you will evaluate each team member.

### **Directions:**

- Create a storyboard using the edited Napoleon Dynamite movie trailer. Remember it must include all scenes and a script.
- After completion of the storyboard determine which members of the team will do the filming and acting. Remember to practice your lines so you can film in the allotted time.

Once you are done filming you will need to capture and edit the footage. To do this follow the steps below. Remember! Each team member must take an active role in the editing, there is enough to do for everyone.

- Create a new project in Premiere. (Remember to save it to the local disk (C:) in the video folder.
- Import the Napoleon Dynamite trailer. Remember, it is in the \\valleyforge\cte\multimedia\premiere\napoleon clips folder. To get there go to My computer, double click on CTE on Valleyforge (M:), double click on Multimedia, double click on Premiere and open the Napoleon Clips folder.
- Drag the clip from the project window to the timeline in Video 1
- You will be editing the trailer to look like the example movie, this is also in the \\valleyforge\cte\multimedia\premiere\napoleon clips folder. To get there go to My computer, double click on CTE on Valleyforge (M:), double click on Multimedia, double click on Premiere and open the Napoleon Clips folder.
- Make sure you save your project frequently.
- Add a beginning title.
- Add closing credits.
- 

If you do this assignment correctly, your video should be 30 seconds long. Not including the opening title and closing credits.
